

How to charge your AAXA LED Pico Pocket Projector

Your LED Pico Pocket Projector included a special charging cable with 3 plugs. To deliver enough power to your device, it is important that you connect all 3 plugs properly.

1. Plug the small 'MicroUSB' connector into the charging port of your projector.

2. Connect both large USB connectors to either your computers USB ports or Dual USB wall charger.

OR

***Connecting only 1 USB plug will deliver insufficient power to your device!**
